

Upgrade for Your Lab

## Upgrade Your Glass Oven B-585 by Reusing your Glassware

**The multipurpose solution for small samples.**

The BUCHI Glass Oven G-300 is a modular instrument: your old 20 years ago bought glassware is still usable! It is possible to use the glassware on the latest instruments. With interchangeable accessories, the Glass Oven G-300 can perform distillation, drying, sublimation, and freeze-drying, eliminating the need for multiple large instruments.

Just update the instrument with different options and have a future proof device.

Get 2025's special price on the most innovative Glass Oven and keep on using **your existing glassware!**
